

## Product Overview

Since 1996 *Opta* have been collating what is now the largest database of player performance statistics in Europe. In this time the depth of *Opta's* data collection has grown considerably and from 2005 onwards it has evolved to include statistics on every ball contact in every match from the major European leagues. *Opta*

can now lay claim to the furthest reaching coverage of player and team data with full technical statistics on over 15 competitions. The *Data Query Tool* allows *Opta* clients to directly explore the breadth and depth of this online archive for the first time.

The screenshot shows the Data Query Tool interface with the following settings:

- Competition: English Barclays Premier League
- Season ID: Season 2011 / 2012
- Game System ID: SBTZ (380 Games)
- Team: Aston Villa
- Opposition: Arsenal

Order 1 : Goals Descending Min:

Order 2 : Minutes Played Descending Min:

Order 3 : Total Shots Descending Min:

Order 4 : Shooting Accuracy Descending Min:

Output : Show:  By Player, Otherwise by Team  Current Players Only  League's Current Players Only

**Build** Excel

Player	Goals ↓	Minutes Played ↓	Total Shots ↓	Shooting Accuracy
Lampard, Frank	9	1391	26	61.53
Sturridge, Daniel	9	1115	42	47.61
Terry, John	4	1890	13	50.00
Ramires	4	1536	32	46.4
Mata, Juan	4	1458	28	32

## Product Detail

Accessed entirely online the *Opta Data Query Tool* allows users to select any competitions followed by specific teams, players or positions and create a multivariate ranking table. This ranking can be customised based on over 120 different performance variables and created across multiple or single seasons. Rankings can be expanded to include user defined combination statistics to add further depth. This very quickly provides

users with a view of how all players and teams compare against each other based on objective statistics and averages. Furthermore, users can extract spreadsheet outputs of player or team data; this can be a single player or team or groups of either. The user interface allows users to filter data on variables such as player age, position, opposition, venue, starting role and dates to create a bespoke output of data that fits these criteria.

## Coverage

The interface allows users to access data from across the following competitions and beyond:

- Premier League
- Champions League
- Europa League
- La Liga
- Serie A
- Bundesliga
- 2. Bundesliga
- Ligue 1
- Eredivisie
- MLS
- Copa Libertadores
- Mexican Primera
- Spanish Segunda
- Russian Premier League
- Norwegian Tippeligaen
- Portuguese Primeira Liga

## Features & Benefits

- Access to the largest most comprehensive database of performance statistics available.
- Entirely online solution.
- Simple and easy to use interface.
- Download spreadsheets of data for further analysis.
- Multi-season searches and rankings.
- Customisable searches and output.
