

The OptaPro Portal

The OptaPro Portal is an accessible, detailed and convenient online data centre, tailor-made for a progressive professional club.

The portal is a centralised, flexible data source, designed to display live, detailed information on a team, club and player level. Powered by Opta's market-leading data, information can be viewed on individual matches, as well as aggregated seasonal trends. By presenting this detailed material in easy-to-view tables and graphics, the Portal represents the most accessible, detailed data analysis tool on the market.

The online widget-based interface is formatted in a way that allows the user to keep track of detailed performance data on players across all club teams, including U21, academy and women's sides, as well as any overseas franchises or feeder clubs from other leagues. The OptaPro Portal also gives users the ability to access detailed player tracking and movement data where available.

The OptaPro Portal is available for live use during games, across any of Opta's full-level data competitions making it a powerful resource for in-game analysis whether for your own team, scouting an opponent or assessing a player. The widget platform also ensures compatibility and access via any platform; PC, tablet or smart phone. Combining this live content with historical and seasonal data provides a simple, user friendly resource to monitor your club's performance.

Key benefits

- Opta's most detailed data feed, fully live.
- Graphical, easy to interpret user-interface.
- Multi-platform.
- Available on over 30 leagues world wide.
- Displays seasonal or game data at both team and player level.
- Where available includes integrated TracAb physical performance data.
