

Supporting clubs and federations with match analysis, opposition scouting and player recruitment

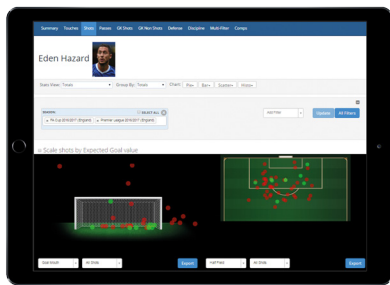

Developed in partnership with TruMedia Networks, ProVision is the cutting edge data analysis tool from OptaPro, tailored to support the progressive professional club in preparation, analysis and performance.

Create and export visualisations at player and team level

Bespoke cross-competition rankings across a range of performance metrics

Integration of advanced metrics including Expected Goals

Create customised graphics synchronised with HD match footage provided by Scout7

The online tool houses detailed Opta performance data and enables you to perform comprehensive analysis at league, club and player level. By presenting this detailed material in a customised, dynamic format, ProVision represents OptaPro's most innovative layer of data-led analysis.

Features of ProVision

- Detailed data from over 40 competitions
- Dynamic rankings, comparisons and analysis across multiple competitions
- Filterable graphics linked to HD video footage
- Integration of advanced metrics, including Expected Goals and Expected Assists
- Created customised reports
- Minute-by-minute breakdown and aggregated season metrics
- Available on all devices
